# Alcohol-free! Lifestyle of 21st century

More and more young people in Europe are choosing the alcohol-free lifestyle. More alcohol-free drinks are available in stores and on the menus of bars. Increasingly, alcohol-free role models are speaking out and speaking up.

But what does it actually mean to enjoy an alcohol-free lifestyle in the 21st century. What's it all about in the end?

- Is it about what do NOT do, or is about something more creative and productive?
- Is it about what we do NOT consume, or is about something more compelling and exciting?
- Is it about consumption or are there other dimensions?
- Is it a lifestyle for a few brave people, or for each and every one?

Join us for our Lifestyle Festival: Alcohol-free the lifestyle of the 21st century!

This lifestyle festival is something you've never seen before:

- A cultural festival,
- An exciting party,
- A leadership workshop,
- An inspiration hub and
- An adventure.

We invite you to share your ideas and thoughts.

And we welcome you to taste what an alcohol-free lifestyle is about; to feel what the lifestyle of the 21st century means; to explore and experience the lifestyle of the future.
