Reducing the legal blood alcohol limit for drivers from 0.08% to 0.05% could reduce 18% of crashes that result in death or injury.
Excise taxes raise prices, reduce demand for alcohol and are a WHO "Best Buy" policy to beat noncommunicable diseases.
The alcohol industry can reduce alcohol use among young people. Regulating the content and volume of alcohol marketing, and online advertising, reaches youth by using social media and promotion sponsorship and promotion.
Screening and brief interventions for hazardous and harmful alcohol use in primary care settings can prevent dependence and reduce alcohol-related harm. World Health Organization
